Secured Entry

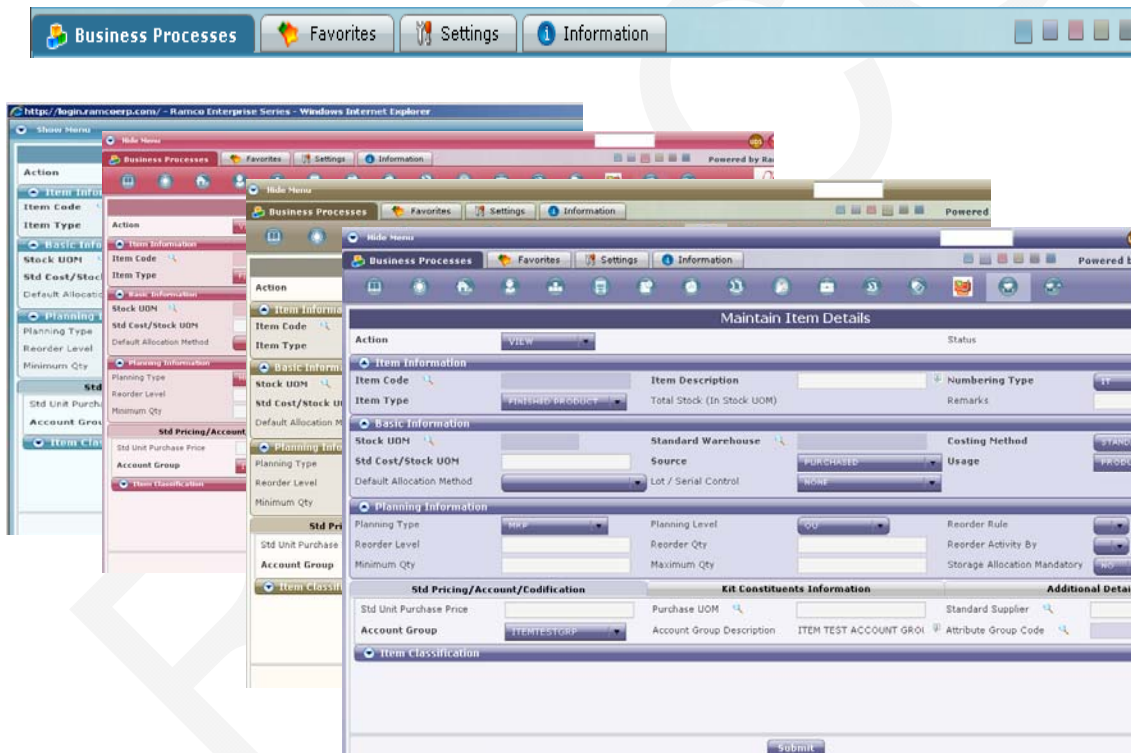

This is a new functionality introduced to enable users gain rightful entry into the system. For users who need to get entry into the system even if another user has logged in, they could use the option of force Login. The user who is already using the system will be disconnected from the application upon the successful login of the new user.

To use this functionality, please select the option Force Login in the login screen.

A screenshot of the OnDemand ERP login screen. The window has a blue title bar and a grey background. At the top left, it says "Login" in bold. To the right of the title is a small icon of a person. Below the title, there are two input fields: "User Name" with a yellow highlight and "Password". At the bottom left, there is a checkbox labeled "Force Login". At the bottom right, there is a "Go" button.

Holi Effect

The spring has just gone by. But still we can celebrate the colors. As an OnDemand user, you now have the choice to select the color of your screen. The color panel at the top of the screen will help you choose your favorite color. Let's celebrate with the choice of colors.

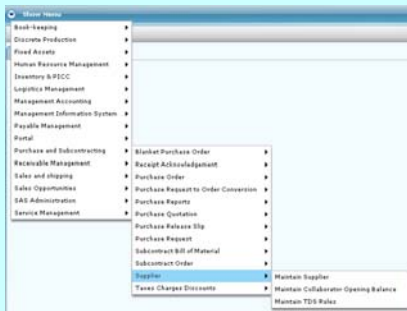

Ala Carte Menu

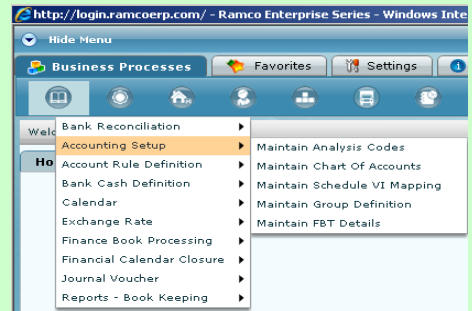

The all new Ramco OnDemand ERP will have multiple menu options for the users to choose. The users will have the menu options of both the tree structure and icon based drop down menu.

The three Tier Tree Structure Menu

Icons Based Drop Down Menu

Dating with Ramco OnDemand ERP

To help user identify those fields that need date as an input, a visually pleasing icon denoting the calendar is placed. These icons are placed by the side of the date fields both in the normal and the multi-line (grid) fields. The users can either choose the date from the calendar or enter the date themselves.

Date From & To 

April 2010						
S	M	T	W	T	F	S
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	

Shapes Do Matter!

Yes, we do believe that shapes do matter and they have a purpose of their own. We have now introduced two types of visually different combos that will help user perform his operations better. The Combos which come with the three dimensional appearance in OnDemand ERP will have different functions based on their shape and appearance.

Finance Book

TRICPFB

Rounded Combo

The rounded combo means a simple selection. No action is performed in the software upon selection of the values in the field.

Item Type

FINISHED PRODUCT

Rectangular Combo

A rectangular combo will mean additional task (like data fetch/defaulting) executed by the system upon selection of value in it.

<input type="checkbox"/>	#	<i>Item Code</i>	<i>Item Description</i>
<input type="checkbox"/>	1		

Task enabled Control columns in Grid

An editable column in the grid (editable field/combo) with an associated task will be appearing in italicized style.

Multi-Functional Grids

The Grid is now available with more fine tuned functionalities. The Control Panel at the bottom of the grid has two views which can be flexed using the arrow key at the right hand corner.

While, most of the Grid Functions remain the same, a few changes have been brought in to improve the aesthetics of the Grid.

Data Download

The data download option is now available on a drop-down menu. The users can choose the option of download after clicking on the download icon.

Search on the Multi-line

The search is now available on the second view of the

Control Panel and the user can choose the column and enter the data to be searched. Please note that the system automatically does a wild card search.

Freeze it. Shut it and forget It

User can choose the columns that need to be fixed in a grid. These key columns in the grid can be frozen by the user to improve the data visibility based on his business needs. Also, the user will

have a customized experience of data entry in the multiline. To enable this, the users will have to enter the column number that needs to be frozen in the control panel of Grid.

Your Real Estate – Our Concern

Real estate is too costly and they need to be put to best use. We in Ramco understand the value the real estate space on your screen. To make sure that every square millimeter of your screen space is utilized, we have worked on hiding certain information which is not required frequently.

The context info of the user like user name, OU information is now available in a separate Tab called Information.

Under the tab, Settings, The users can change their settings like OU, Favorites and Password.

The user can view the current login details from the information Tab.

Accelerators

The accelerators come with added flexibility. The users are now provided with an additional prompter, which prompts the name of the screen that the user intends to launch. We strongly believe that such simple enhancements will help you in increasing the productivity of users.

RAMCO

Help in Need

rest of the transaction.

It is now easier to access help screens under specified conditions. For those Editable fields with help Icon and not having grayed background, the help screen can be launched by just pressing the enter key. The user can then select the data and continue with the

Pay Term 

RAMCO

Friendly Bar

A floating tool bar with the most commonly used functions like Switch context, Refresh screen is now available. This toolbar which is available at the bottom of the screen can be dragged and placed at any place of the screen. This will remain at the top irrespective of the number of screens you use. This is just another 'Cool Addition' from Ramco to help you simplify application usage.
